25X1

FROM:

or Iraining and Education

SUBJECT:

Request for Approval of a Communications Equipment Poom in Chamber of Commerce

Building

- 1. One of the critical items in the long-range space planning for the Office of Training and Education in the Chamber of Commerce (CofC) Building is the construction and the furnishing of a communications equipment room.
- The construction of a communications equipment room would allow for enhanced and expanded data communications facilities as well as meeting the requirement to provide instruction in the newly developed computer-based systems SAFE and CAMS. This would give us greater scheduling flexibility and allow for an increase in the number of students per course. As the automation needs of OTE are developed, the increased communications network will permit the expansion of terminals throughout the building, thereby reducing the cost of piecemeal and patchwork add-ons as has been previously practiced.
- The present time appears to be most opportune to move ahead with this proposal. The Office of Communications has recently advised OTE that they will make available to us the necessary equipment for this facility. This was budgeted by them in FY-81, and the Commo equipment can be installed as soon as the room has been made ready. OTE has budgeted for the construction of such a facility in FY-83. Therefore OTE would require unfunded monies in FY-81 or FY-82 to complete this project.
- 4. The Office of Logistics has estimated that OD&E will vacate their holdings in the CofC Building in the summer or fall of 1981. OTE has requirements for a sizeable portion of the OD&E space following their relocation. Specific requirements of our future needs will be the subject of a separate memorandum. immediate priority is to request a commitment for the fortage
